

100-Process Intelligence Engine

Mandatory 5-Layer Architecture — MODUS Enterprise AI Build Challenge, Assignment 2

- Data flows both directions: the UI requests data, layers below persist and return results.
- This is the exact architecture required by the challenge brief's "Mandatory Application Architecture" section.
- Candidates chose their own tech per layer — this diagram documents this specific submission's choices.

Component-Level Architecture & Information Flow

How a single process — seed data or the evaluator's live Process 101 — moves through the system
